

# HP Scitex FB950/FB500/FB700 Printer Series - Printer Cleaning Kit Contents

## Information

HP Part number CQ121A, *HP Scitex FB500/700/950 Printer Cleaning Kit*, is a collection of supplies intended for use with the HP Scitex FB500, FB700, and FB950 printers. The kit contains sufficient supplies to maintain 1 (one) printer according to the recommended cleaning schedule, which itself is determined by actual time printing, not by calendar time elapsed. The kit typically lasts 3 months (one quarter of a year) based on average usage patterns. **Average usage** is defined as eight (8) hours per day printing, five days per week. More frequent usage of the printer will consume the supplies more quickly; less frequent usage of the printer will consume the supplies more slowly.

Instructions for performing the cleaning tasks on the respective printers are found in the product *User Guides*.

The kit is a consumable item and should be ordered through the normal channels used for ink and other supplies. Check with the local reseller or visit the official hp website for assistance.

## Details

The specific contents of the kit are as follows:

- Carriage fan filters (used on FB950 only) 2 ea
- Service station wiper blade 1 ea
- UV Lamp air filters 2 ea
- Latex gloves 6 ea
- Wiper rail grease packets 7 ea
- Lint-free cleaning cloths 60 ea
- Oiled cloth for rail lubrication 1 ea
- Cotton swabs for cleaning carriage wheels 12 ea
- General instructions sheet 1 ea

### **Additional customer-supplied required materials for cleaning**

The following items are required for some of the cleaning tasks, but are not included in the CQ121A Cleaning Kit:

- CH122A, HP 1-liter UV Printhead Flush
- Isopropyl alcohol (IPA), 70% dilution

In some areas of the world, the sale and use of these chemicals are not permitted by local regulations, and suitable substitutes must be used instead. Consult the printer *User Guide* (CQ114-90027) or the *User Cleaning Instructions document*(CQ114-90034), or check with the local HP reseller or HP Customer Care Center if one needs guidance selecting an HP-approved substitute.

**Other applications:**

The majority of the contents of CQ121A are applicable also to the HP Designjet H-Series of printers, but there are no specific instructions provided with the kit for this printer.
