

JT 5817 PUV

Budget See-tru film monomeric white PVC, 180 µm, micro-perforated for one way vision. Especially designed for UV ink prints.

An entry-level material that opens up new creative flexibility for designers working on displays, vehicles and exhibitions - where areas of glass are available. JT 5817 PUV is a see-through white 180 µm vinyl that uses a black reverse coating (40% perforated) to give one-way vision. This PVC film is an excellent choice for applications where a solid image continues onto a vehicle window, or in retail/commercial/event venues where glass surfaces are used to deliver brand messages. Fire certification is M1, and outdoor durability is 1 year.

KEY FEATURES

- ***One way vision (with 40 % perforated surface)**
- ***Optimal printability with UV inks**
- ***Creative flexibility**

SPECIALLY DESIGNED FOR

- ***Event and mobile advertising, ...**
- ***Large-format, high-impact visuals on building and shop windows**
- ***Image spanning windows**
