

## Product Overview

The UJF MkII Series print direct to substrate and are ideal for promotional, personalisation and small run printing. You can offer whole promotional ranges thanks to the 'kebab' options which allows cylindrical printing. Available in two sizes: A3 (3042 and 3042 EX) or A2 (6042).

## Mimaki's cutting edge - small format UV printer

### KEY FEATURES

- Substrates include glass, plastics, leather, metal, card, foil, wood and uneven surfaces
- High quality print resolution of up to 1,200dpi
- Print speeds up to 2.48m<sup>2</sup>/h
- One staggered head on 3042 MkII. Two staggered heads on EX model and 6042 MkII
- High head gap – print media up to 153mm thick
- Up to 7 colours plus clear and primer
- Clear, primer and white inks can be run concurrently in 6042 and 3042 EX models
- Full cover dust protection to maintain print quality
- Choice of rigid or flexible inks: LUS-120 stretches up to 170%; LUS-150 stretches up to 150%
- 'Kebab' option available to print cylindrical items
- 1-litre bulk ink system as standard
- Utilises Mimaki Core Technology for high image quality and stable production
- Environmentally friendly: Low power consumption; LED-UV generates no heat and no ozone; inks are certified to GREENGUARD Gold.

### APPLICATIONS

- Phone cases
- Trophies
- Bottles
- USB sticks
- Key rings
- Golf balls
- Small signage
- Plaques
- Boxes and packaging
- Stationery
- Custom panels and parts
- Toys

### SOFTWARE

Both **RasterLink6** maximises performance while remaining intuitive and user-friendly; features include powerful template tools allow you to take advantage of available jigs and a convenient web profile update function.

### MIMAKI CORE TECHNOLOGIES

Integrated Mimaki technologies allow for exceptional print quality and continuous productivity:

- Reduce visible banding thanks to Mimaki Advanced Pass System 4 (MAPS)
- Reduced image noise due to Mimaki Fine Diffusion, ensuring prints are optimised even at lower resolutions
- Mimaki Clear Control allows you to add embossing or a glossy finish without any dust adhesion.
- Mimaki Circulation Technology continuously agitates white ink to prevent it settling and depositing pigment
- Print on uneven surfaces with **LD mode**
- Nozzle Check Unit detects nozzle outages and automatically starts recovery when required
- The Nozzle Recovery System detects defective nozzles and substitutes them with operational nozzles.

RRP: (UJF-3042) £20,995 / (UJF-3042EX) £25,995  
(UJF-6042) £35,995
