

Monkey Strips 2.0 are pre-cut felt buffers that are ideal for all types of wrap installations like commercial, color change, PPF and tint. These durable buffers have a low friction surface that allows the squeegee to glide across the film and reduce common scratches to almost zero. Monkey Strips can be easily removed and leave little to no adhesive residue on the squeegee. Specially unique to Monkey Strips is their thinness compared to other squeegee buffers on the market place. The thinness of the Monkey Strip allows an installer to apply the film, particularly on vehicles, with more precision and less heat, which raises quality and avoids overstretching.

** Monkey Strips 2.0 can be used dry or wet*

- All Monkey Strip orders come with the famous monkey sticker
- Size: 102mm x 20mm
- Custom sizes and colors of the Monkey Strips available – contact admin@monkeystrips.com
